# SURVEY *of* CURRENT BUSINESS

## U.S. Department of Commerce

Ronald H. Brown, *Secretary*

### Economics and Statistics Administration

Everett M. Ehrlich, *Under Secretary for Economic Affairs*

### Bureau of Economic Analysis

J. Steven Landefeld, *Acting Director*

SURVEY OF CURRENT BUSINESS. Published monthly by the Bureau of Economic Analysis of the U.S. Department of Commerce. Editorial correspondence should be addressed to the Editor-in-Chief, SURVEY OF CURRENT BUSINESS, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Subscriptions to the SURVEY OF CURRENT BUSINESS are maintained, and their prices set, by the Government Printing Office, an agency of the U.S. Congress. Postmaster: Send address changes to:

Superintendent of Documents,  
U.S. Government Printing Office,  
Washington, DC 20402.

The GPO order desk number is (202) 512-1800. The subscription complaint desk number is (202) 512-1806.

#### **Subscription and single-copy prices:**

*Second-class mail:* \$41.00 domestic,  
\$51.25 foreign.

*First-class mail:* \$89.00.

*Single copy:* \$11.00 domestic,  
\$13.75 foreign.

Make checks payable to the Superintendent of Documents.

Second-class postage paid at Washington, DC and at additional mailing offices. (USPS 337-790).

The Secretary of Commerce has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department.

*Editor-in-Chief* Douglas R. Fox  
*Executive Editor* Leland L. Scott

*Publication Staff:* W. Ronnie Foster, M. Gretchen Gibson,  
Ernestine T. Gladden, Eric B. Manning

**THIS ISSUE of the SURVEY went to the printer on September 11, 1995. It incorporates data from the following monthly BEA news releases:**

Gross Domestic Product (August 30),  
Personal Income and Outlays (August 31), and  
Composite Indexes of Leading, Coincident, and Lagging  
Indicators (September 1).

# TABLE OF CONTENTS

## *Regular features*

---

### 1 Business Situation

*BEA's featured measure of real GDP growth, which is based on fixed 1987 weights, increased 1.1 percent in the second quarter of 1995, down from a 2.7-percent increase in the first quarter. BEA's chain-weighted measure of real GDP also slowed sharply—to a 0.5-percent increase from a 1.7-percent increase. Corporate profits increased \$15.5 billion after increasing \$9.4 billion. The Federal Government deficit fell to \$128.0 billion, the lowest level since the second quarter of 1982, while the State and local government surplus declined to \$26.1 billion.*

### 35 State Personal Income, Revised Estimates for 1992–94

*The annual estimates of State personal income for 1992–94 have been revised to incorporate newly available national and State-level source data. For 1993, personal income was revised up substantially for most States in the Rocky Mountain region and for some States in the Plains region. For 1994, personal income was revised down for all regions except the Rocky Mountain region; the largest downward revisions were for the Mideast and Great Lakes regions.*

## NATIONAL INCOME AND PRODUCT ACCOUNTS

The upcoming comprehensive, or benchmark, revision of the national income and product accounts (NIPA's) is scheduled for release at the end of 1995; the usual annual revision covering 1992–94 will be combined with the comprehensive revision. The article in the July 1995 *SURVEY* that discusses BEA's new featured measures of real output and prices was the first in a series of articles previewing the comprehensive revision. Future articles will cover other changes, including (1) definition of government expenditures for plant and equipment as investment, which will result in a more consistent treatment of investment in the NIPA's, (2) introduction of an improved empirical basis for the estimates of depreciation and capital stocks, and (3) improvements in the presentation of the NIPA's.

---

## BUSINESS CYCLE INDICATORS

After evaluating proposals received from several private organizations, the Department of Commerce has selected The Conference Board to take over the preparation and dissemination of the composite indexes of leading, coincident, and lagging indicators. Details of the transition have not been finalized, but the indexes will continue to be produced with no immediate changes in composition, methodology, or schedule.

As part of a reprogramming of selected resources into areas that are vital to its mission of preparing economic accounts, BEA will soon discontinue the "Business Cycle Indicators" (BCI) section of the *SURVEY*, probably by the end of 1995. However, The Conference Board has indicated that it intends to begin maintaining and publishing a set of data similar to the BCI section. In addition, data for many BCI series will continue to be available from their government or private sources; a listing of these sources will be published in an upcoming *SURVEY*.

---

B U S I N E S S                      S I T U A T I O N

This article was prepared by Daniel Larkins, Ralph W. Morris, Joyce M. Northwood, and Deborah Y. Sieff.

ACCORDING to the “preliminary” estimates of the national income and product accounts (NIPA’s), the fixed-weighted measure of real gross domestic product (GDP) increased 1.1 percent in the second quarter of 1995; the “advance” estimate of real GDP, reported in the July “Business Situation,” had shown a 0.5-percent increase. An alternative measure of real GDP—the chain-type annual-weighted measure—increased 0.5 percent, according to the preliminary estimates; the advance estimates had shown a 0.2-percent decrease (see the section “Alternative measures”).<sup>1</sup>

The fixed-weighted measure of the change in real gross domestic purchases was revised up to a 1.7-percent increase from a 1.0-percent increase reported a month ago. The fixed-weighted price index for gross domestic purchases increased 3.0 percent, 0.1 percentage point more than reported

a month ago. (The sources of the revisions are discussed in the section “Revisions.”) The 1.1-percent increase in the fixed-weighted measure of real GDP in the second quarter was markedly lower than the increases in the past few quarters (chart 1). The slowdown from a

1. Quarterly estimates in the NIPA’s are expressed at seasonally adjusted annual rates, and quarterly changes are differences between these rates. Quarter-to-quarter percent changes are annualized. Real, or constant-dollar, estimates are expressed in 1987 dollars.

In the next comprehensive revision of the NIPA’s, which is scheduled for the end of 1995, the featured measure of real GDP growth will be calculated using chain-type annual-weighted indexes similar to those presently published as an alternative measure. For more information, see “Preview of the Comprehensive Revision of the National Income and Product Accounts: BEA’s New Featured Measures of Output and Prices” in the July 1995 SURVEY OF CURRENT BUSINESS.

Table 1.—Real Gross Domestic Product, by Major Type of Product  
[Seasonally adjusted at annual rates]

	Billions of 1987 dollars					Percent change from preceding quarter

Addenda:									
Final sales of domestic product ....	5,452.5	55.1	74.4	34.6	33.5	4.3	5.7	2.6	2.5
Change in business inventories ....	32.7	-2.1	-7.7	1.7	-18.4				

NOTE.—Most series are found in NIPA table 1.4. Output of motor vehicles is the sum of auto output and truck output (from tables 8.4 and 8.6, respectively).

CHART 1

Real Product:  
Change from Preceding Quarter

2.7-percent increase in the first quarter reflected downturns in the output of goods and of structures; in contrast, the output of services stepped up substantially (table 1).

Inventory investment—which turned down sharply, as inventory accumulation decreased after a small increase—bore the brunt of the slowdown in GDP. In contrast, final sales of domestic product hardly slowed at all, as a 2.5-percent increase followed a 2.6-percent increase. Within final sales, a step-up in personal consumption expenditures nearly offset a weakening in residential and nonresidential investment (table 2).

Imports and exports account for the difference between GDP (the goods and services produced in the United States) and gross domestic purchases (the goods and services purchased by U.S. residents). In the second quarter, gross domestic purchases again increased more than GDP, as imports continued to increase more than exports.

### Personal consumption expenditures

Real personal consumption expenditures (PCE) increased 3.4 percent in the second quarter after increasing 1.6 percent in the first (table 3).

**Table 2.—Real Gross Domestic Product, Real Gross Domestic Purchases, and Real Final Sales to Domestic Purchasers**

1. Gasoline and oil, and fuel oil and coal.

2. Electricity and gas.

NOTE.—Dollar levels are found in NIPA table 2.3. New auto and truck purchases are found in tables 8.4 and 8.6, respectively. Percent changes in major aggregates are found in table 8.1.

Expenditures on durable goods and on services contributed about equally to the step-up; expenditures on nondurable goods increased a little less than in the first quarter.

The step-up in consumer spending is not easily explained in terms of several of the factors usually considered in analyses of PCE ([chart 2](#)). Real disposable personal income turned down after decelerating. The unemployment rate increased to 5.7 percent from 5.5 percent. The Index of Consumer Sentiment (prepared by the University of Michigan's Survey Research Center) decreased.

Expenditures for durable goods increased 2.9 percent after decreasing 3.4 percent. The upturn was accounted for by motor vehicles and parts and by furniture and household equipment. Motor vehicles and parts decreased much less than in the first quarter; new autos accounted for the improvement. Furniture and household equipment increased more than twice as much as in the first quarter.

**CHART 2**

### Selected Factors Affecting Consumer Spending

Percent change

1. Disposable personal income in 1987 dollars; seasonally adjusted annual rates.

2. All civilian workers, seasonally adjusted.

Data: U.S. Department of Labor, Bureau of Labor Statistics

3. Data: University of Michigan's Survey Research Center.

U.S. Department of Commerce, Bureau of Economic Analysis

Expenditures for services increased 4.3 percent after increasing 2.6 percent. The step-up was accounted for by energy and by "other" services, both of which increased more than twice as much as in the first quarter. The step-up in energy reflected a response to colder-than-usual springtime weather following warmer-than-usual winter weather in much of the Nation. In contrast to the step-ups in energy and "other" services, housing and medical care services increased a little less than in the first quarter, and transportation services were unchanged after increasing.

Expenditures for nondurable goods increased 2.0 percent after increasing 2.3 percent. Food edged down after increasing, and energy slowed. Clothing and shoes increased after little change, and "other" nondurable goods increased a little more than in the first quarter.

### Nonresidential fixed investment

Real nonresidential fixed investment increased 11.8 percent in the second quarter after increasing 21.5 percent in the first ([table 4](#)). Most of the slowdown was accounted for by producers' durable equipment (PDE), which increased half as much as in the first quarter.

Financial factors were more favorable to investment in the second quarter, but other factors were less so. Among the financial factors, profits posted its largest increase in a year, and cash flow increased for the second consecutive quarter. In addition, borrowing costs—as measured by the yield on new high-grade corporate bonds—decreased for the second consecutive quarter; at 7.73 percent, the rate was more than a full percentage point lower than in the fourth quarter of 1994. Among the nonfinancial factors, the capacity utilization rate in manufacturing posted its first quarterly decrease in 2 years, dropping to 83.1 percent from 84.7 percent, and real final sales of domestic product increased only modestly for the second consecutive quarter.

Structures increased 10.1 percent after increasing 11.5 percent. Nonresidential buildings increased less than in the first quarter; a downturn in commercial construction more than offset a step-up in industrial construction. Mining exploration, shafts, and wells—mainly oilwell drilling—decreased slightly after an increase. Construction by utilities turned up, and "other" structures increased more than in the first quarter.

PDE increased 12.3 percent after increasing 24.5 percent. The slowdown reflected downturns in

transportation equipment and in "other" PDE that were partly offset by a step-up in information processing equipment, mainly computers. The downturn in transportation equipment was accounted for by aircraft and trucks; autos was unchanged after decreasing.

### Residential investment

Real residential investment decreased 13.2 percent in the second quarter after decreasing 3.4 percent in the first. Single-family structures decreased much more than in the first quarter, and multifamily structures increased somewhat less than in the first quarter; "other" residential investment decreased less than in the first quarter.<sup>2</sup>

Single-family construction decreased 25.9 percent after decreasing 6.8 percent. Single-family construction in a quarter is largely determined by single-family housing starts in that quarter and in the preceding quarter. Thus, construction in the second quarter of 1995 reflected starts in the first and second quarters. In these two quarters, single-family starts averaged 1.02 million units (seasonally adjusted annual rate), down from an average of 1.12 million units in the fourth quarter of 1994 and the first quarter of 1995 (chart 3).

Multifamily construction increased for the sixth consecutive quarter. The increase occurred

despite a rise in the rental vacancy rate to 7.7 percent, its highest rate since the first quarter of 1993.

"Other" residential investment decreased 1.2 percent after decreasing 4.5 percent. Brokers' commissions were flat, as house sales increased little even though the commitment rate on 30-year fixed-rate mortgages dropped to 7.95 percent from 8.81 percent (chart 4).

Other .....	95.6	-.6	2.6	-1.1	-3	-2.5	11.5	-4.5	-1.2

NOTE.—Dollar levels are found in NIPA table 5.5. Motor vehicles include new and used autos (from table 8.4) and new trucks (from table 8.6). Percent changes in major aggregates are found in table 8.1.

## Inventory investment

Real inventory investment—that is, the change in business inventories—decreased \$18.4 billion in the second quarter after increasing \$1.7 billion in the first. The decrease mainly reflected a slowdown in nonfarm inventory accumulation to \$31.9 billion in the second quarter from \$49.1 billion in the first (table 5).

Retail and wholesale trade accounted for most of the slowdown in nonfarm accumulation. At the retail level, inventories held by auto dealers decreased after an increase. At the wholesale level, most of the slowdown was accounted for by inventories of durable goods, which increased about half as much as in the first quarter.

In contrast to the weakness in trade inventories, manufacturing inventories increased even more than in the first quarter, when they had posted their biggest increase in almost 6 years. Two-thirds of the step-up in the second quarter was accounted for by durable goods.

Farm inventories increased \$0.9 billion after increasing \$2.0 billion. Inventories of livestock increased after a decrease. Inventories of crops decreased slightly after an increase.

The constant-dollar ratio of nonfarm inventories to all final sales of domestic businesses was unchanged at 2.49. A ratio in which final sales are limited to goods and structures rose to 4.25 from 4.23. Both ratios are low by historical standards.

## Exports and imports of goods and services

Real exports increased 6.1 percent in the second quarter after increasing 4.8 percent in the first. Real imports increased 9.5 percent after increasing 10.1 percent (table 6).

Exports of goods increased 8.5 percent after increasing 7.4 percent. Exports of agricultural products decreased after no change, but exports of nonagricultural products stepped up. Exports of civilian aircraft turned up sharply, and exports of nonautomotive consumer goods turned up moderately. In contrast, exports of autos, of industrial supplies and materials, and of “other” goods turned down. Exports of services decreased less than in the first quarter.

Imports of goods increased 11.7 percent after increasing 9.3 percent. Imports of petroleum turned up, and imports of nonpetroleum products increased more than in the first quarter. Among nonpetroleum products, the biggest step-up was in nonautomotive capital goods, mainly

NOTE.—Dollar levels for change in real business inventories are found in NIPA table 5.11. Motor vehicles are found in tables 8.4 (autos) and 8.6 (trucks).

computers; industrial supplies and materials also stepped up, and “other” goods turned up. In contrast, imports of autos and of foods, feeds, and beverages turned down, and imports of nonautomotive consumer goods slowed. Imports of services decreased after a sharp increase.

### Government purchases

Real government purchases decreased 0.8 percent in the second quarter after decreasing 0.7 percent in the first (table 7). Federal Government purchases decreased somewhat more than in the first quarter, and State and local government purchases increased somewhat more.

Federal nondefense purchases decreased 8.6 percent after increasing 3.6 percent. All categories except employee compensation contributed to the downturn. Commodity Credit Corporation inventory change made the biggest contribution.

Federal defense purchases decreased 2.9 percent after decreasing 7.5 percent. Purchases of services turned up, though compensation of employ-

ees decreased for the 17th consecutive quarter. Purchases of military hardware turned down.

State and local government purchases increased 1.6 percent after increasing 1.0 percent. The slight pickup reflected a rebound in structures.

### Revisions

The preliminary estimate of a 1.1-percent increase in the fixed-weighted measure of real GDP in the second quarter is 0.6 percentage point higher than the advance estimate (table 8).<sup>3</sup> Preliminary estimates of the increases in the fixed-weighted price indexes for gross domestic purchases (3.0 percent) and for GDP (2.8 percent) are 0.1 percentage point higher than the advance estimates.

The revision to GDP reflected upward revisions to consumer spending and to inventory investment that were partly offset by downward revisions to net exports and to government

3. Over the past 10 years, the average revision to the change in real GDP from the advance to the preliminary estimate, without regard to sign, has been 0.5 percentage point.

NOTE.—Dollar levels are found in NIPA table 3.B, and percent changes are found in table 8.1.

spending. The upward revision to personal consumption expenditures mainly reflected the incorporation of revised Census Bureau data on retail sales for May and June; it also reflected new source data on components of household operation (telephone usage and energy consumption). The upward revision to inventory investment was more than accounted for by the incorporation of newly available data on livestock inventories from the Department of Agriculture. In nonfarm inventories, a downward revision that was based on revised Census Bureau data on the book value of inventories more than offset an upward revision to the inventory val-

uation adjustment that was based on newly available data on prices from the U.S. Department of Energy and from the Bureau of Labor Statistics.

The downward revision to net exports reflected the incorporation of revised data on exports and imports of goods and services for May and newly available data for June. The downward revision to government purchases was mostly in Federal nondefense purchases and reflected the incorporation of newly available source data on detailed Federal outlays for June and newly available source data on construction put in place for June.

NOTE.—Preliminary estimates for the second quarter of 1995 incorporate the following revised or additional major source data that were not available when the advance estimates were prepared a month ago.

*Personal consumption expenditures:* Revised retail sales for May and June, and consumers' share of new car purchases for May.

*Nonresidential fixed investment:* Construction put in place for April and May (revised) and June, revised manufacturers' shipments of machinery and equipment for May and June, and business' share of new car purchases for May.

*Residential investment:* Construction put in place for April and May (revised) and June.

*Change in business inventories:* Manufacturing and trade inventories for May (revised) and June.

*Net exports of goods and services:* Merchandise exports and merchandise imports for May (revised) and June.

*Government purchases:* Federal outlays for January through May (revised) and June, State and local construction put in place for April and May (revised) and June, and revised State and local government employment for May and June.

*Wages and salaries:* Revised employment, average hourly earnings, and average weekly hours for May and June.

*GDP prices:* Detailed merchandise export and import price indexes for April through June, values and quantities of petroleum imports for June, and housing prices for the quarter.

### Alternative measures

Like the fixed-weighted measure of real GDP, BEA's alternative measures show the economy growing slowly in the second quarter (table 9). According to the fixed-weighted measure, real GDP increased 1.1 percent; according to the alternative measures—the chain-type annual-weighted measure and the benchmark-years-weighted measure—real GDP increased 0.5 percent. A decrease in inventory investment was the major cause of the sluggish growth in all these measures. Final sales of domestic product—GDP less inventory investment—increased 2.5 percent with fixed weights, 1.6 percent with chain-type weights, and 1.7 percent with benchmark-years weights.

**Table 9.—Fixed-Weighted and Alternative Quantity and Price Indexes**

[Percent change at annual rates; based on seasonally adjusted index numbers (1987=100)]

	1994		1995	
	III	IV	I	II

Chain-type annual weights .....	3.2	2.4	2.9	2.8
Benchmark-years weights .....	3.2	2.5	2.9	2.8

NOTE.—Percent changes are found in NIPA table 8.1. Index number levels are found in tables 7.1 and 7.2.

The difference between the change in the featured measure of GDP and the change in the alternative measures was more than accounted for by a strong increase in business purchases of computers, a product whose prices have decreased steadily since 1987. The decrease in inventory investment reduced the difference between the featured and the alternative measures from what it otherwise would have been; inventory prices have increased less than overall prices since 1987.

In the first quarter, both alternative measures of GDP had increased about 1 percentage point less than the fixed-weighted measure. About four-fifths of this difference was accounted for by computers.

Both alternative price indexes for gross domestic purchases increased 2.8 percent in the second quarter, 0.2 percentage point less than the featured fixed-weighted price index. In the first quarter, both alternative price measures increased 2.9 percent, 0.1 percentage point less than the featured measure.

The preliminary estimates of the change in the alternative measures of real GDP are 0.7 percentage point higher than the advance estimates published last month. For prices of gross domestic purchases, the chain-type measure was revised up 0.1 percentage point, and the benchmark-years measure was unrevised.

### Corporate Profits

Profits from current production increased \$15.5 billion in the second quarter after increasing \$9.4 billion in the first (table 10).<sup>4</sup>

The step-up reflected an upturn in profits from domestic operations of nonfinancial corporations, as unit profits of these corporations rebounded from a first-quarter drop; real gross product of nonfinancial corporations increased less than in the first quarter. Changes in unit labor costs, which decreased in the second quarter after increasing in the first, were primarily responsible for the changes in unit profits; unit prices were unchanged in both quarters.

In contrast to the improvement in profits of nonfinancial corporations, profits from domestic operations of financial corporations changed little after increasing, and profits from the rest of the world slowed.

Cash flow from current production, a profits-related measure of internally generated funds available for investment, increased \$21.5 billion after increasing \$9.1 billion. The ratio of cash flow to nonresidential fixed investment, an indicator of the share of the current level of investment that could be financed by internally generated funds, increased to 76.9 percent from 75.4 percent; the increase followed six consecutive decreases.

**Industry profits.**—Industry profits increased \$18.3 billion after increasing \$10.2 billion.<sup>5</sup> Profits of nonfinancial industries increased \$11.5 billion after decreasing \$6.8 billion. The upturn appears to have been in manufacturing and, to a lesser extent, in the transportation and public utilities group; in contrast, profits in trade appear to have decreased more than in the first quarter, and

5. Industry profits are estimated as the sum of profits before tax and the inventory valuation adjustment (IVA); it is shown in NIPA table 6.16C as "corporate profits with IVA." Estimates of the capital consumption adjustment by industry do not exist.

**Table 10.—Corporate Profits**

4. Profits from current production is estimated as the sum of profits before tax, the inventory valuation adjustment (IVA), and the capital consumption adjustment (CCAdj); it is shown in NIPA tables 1.14, 1.16, and 6.16C as "corporate profits with IVA and CCAdj."

NOTE.—Levels of these and other profits series are found in NIPA tables 1.14, 1.16, 6.16C, and 7.15.

IVA Inventory valuation adjustment  
CCAdj Capital consumption adjustment

profits in "other nonmanufacturing" appear to have slowed. Profits of financial industries increased \$1.2 billion after increasing \$8.0 billion; the slowdown appears to reflect a downturn in profits of commercial banks.

Profits from the rest of the world increased \$5.6 billion after increasing \$9.0 billion. This component of profits measures receipts of profits from foreign affiliates of U.S. corporations less payments of profits by U.S. affiliates of foreign corporations. Receipts increased about half as much as in the first quarter, and payments decreased slightly after a small increase.

## Government Sector

The fiscal position of the government sector continued to improve in the second quarter of 1995, as the combined deficit of the Federal Government and of State and local governments decreased \$18.7 billion, to \$101.9 billion (table 11). An improvement in the Federal Government deficit was partly offset by a decrease in the surplus of State and local governments.

### Federal

The Federal Government deficit fell \$20.8 billion in the second quarter after decreasing \$12.3 billion in the first. At \$128.0 billion, the second-quarter deficit was the lowest since the second quarter of 1982.

**Receipts.**—Receipts increased \$34.5 billion in the second quarter after increasing \$32.1 billion in the first. Personal tax and nontax receipts again increased strongly, and indirect business tax and nontax accruals increased after a decrease; corporate profits tax accruals and contributions for social insurance both increased less than in the first quarter.

Personal tax and nontax receipts increased \$28.6 billion after increasing \$20.6 billion. Net nonwithheld personal income taxes increased \$18.4 billion after increasing \$10.4 billion; the acceleration reflected provisions of the Omnibus Budget Reconciliation Act of 1993 that allowed certain retroactive taxes to be paid in three annual installments, the second of which was due in April 1995. Withheld personal income taxes increased \$8.7 billion after increasing \$10.4 billion, reflecting a slowdown in wages and salaries.

Indirect business tax and nontax accruals increased \$1.8 billion after decreasing \$2.8 billion. This turnaround reflected a partial rebound in collections of customs duties, which had dropped

in the first quarter as a result of reduced tariffs under the General Agreement on Trade and Tariffs and the North American Free Trade Agreement.

Contributions for social insurance increased \$3.4 billion after increasing \$10.5 billion. First-quarter contributions were boosted by an increase in the social security taxable wage base and by an increase in monthly premiums for supplemental medical insurance, both of which became effective in January 1995.

NOTE.—Dollar levels are found in tables 3.2 and 3.3 of the "Selected NIPA Tables."

Corporate profits tax accruals increased \$0.7 billion after increasing \$3.8 billion. This deceleration reflected a downturn in domestic pretax profits excluding profits of Federal Reserve banks.

*Expenditures.*—Expenditures increased \$13.7 billion in the second quarter after increasing \$19.8 in the first. The deceleration was mainly attributable to a downturn in purchases and to slowdowns in subsidies less current surplus of government enterprises, transfer payments, and grants-in-aid to State and local governments.

Subsidies less current surplus of government enterprises decreased \$6.9 billion after decreasing \$2.6 billion. Subsidies decreased \$6.7 billion after increasing \$2.0 billion; the deceleration primarily reflected agricultural subsidies, which decreased \$5.5 billion after increasing \$2.7 billion. The current surplus of government enterprises increased \$0.1 billion after increasing \$4.7 billion. The Postal Service accounted for most of this deceleration; in the first quarter, the Postal Service surplus increased as a result of a postal-rate increase that went into effect in January.

Purchases decreased \$1.5 billion after increasing \$2.5 billion. This downturn was accounted for by nondefense purchases, which decreased \$2.5 billion after increasing \$4.0 billion. Compensation of employees decreased \$0.3 billion after increasing \$2.4 billion: Incentive payments (“buyouts”) for civilian employees who voluntarily leave Federal service had boosted compensation by \$1.5 billion in the first quarter but by only \$0.1 billion in the second; a pay raise had boosted compensation by \$1.3 billion in the first quarter. Defense spending increased \$1.1 billion after decreasing \$1.6 billion. An upturn in purchases of services was largely offset by a downturn in purchases of durable goods.

Transfer payments increased \$8.0 billion after increasing \$8.9 billion. Transfer payments to persons increased much less than in the first quarter, while transfer payments to the rest of the world decreased much less than in the first quarter. Transfer payments to persons increased \$8.5 billion in the second quarter after increasing \$20.7 billion in the first. In the first quarter, transfer payments to persons were boosted \$10.2 billion by 2.8-percent cost-of-living adjustments for social security benefits (old-age, survivors, and disability insurance), railroad retirement, and veterans compensation and pensions and for supplemen-

tal security income, which became effective in January; transfer payments were also boosted \$5.1 billion by an expansion of eligibility and higher benefits for the earned income tax credit, which also became effective in January. Transfer payments to the rest of the world decreased \$0.5 billion after decreasing \$11.8 billion. The first-quarter decrease followed a large fourth-quarter increase that included \$12.0 billion (annual rate) in economic support and other payments to Israel.

Grants-in-aid to State and local governments increased \$4.7 billion after increasing \$5.5 billion. This deceleration reflected slowdowns in grants for highways and downturns in grants for mass transit, environmental protection, community development, and health care.

Net interest paid increased \$9.4 billion after increasing \$5.5 billion. This acceleration was largely attributable to gross interest paid, which increased \$8.7 billion after increasing \$5.9 billion.

### *State and local*

The State and local government surplus decreased \$2.1 billion, to \$26.1 billion, in the second quarter after decreasing \$0.6 billion in the first.

Receipts increased \$11.6 billion in the second quarter after increasing \$13.5 billion in the first. All the components of receipts except indirect business taxes contributed to the deceleration. Personal tax and nontax receipts increased \$0.7 billion after increasing \$2.2 billion; slower growth in income tax receipts accounted for the deceleration. As noted above, Federal grants-in-aid increased \$4.7 billion after increasing \$5.5 billion. Indirect business tax and nontax accruals increased \$5.5 billion after increasing \$4.5 billion; the acceleration was primarily in “other” indirect business taxes and property taxes.

Expenditures increased \$13.6 billion in the second quarter after increasing \$14.2 billion in the first. The deceleration was more than accounted for by a slowdown in purchases, which increased \$9.8 billion after increasing \$10.5 billion. The deceleration in purchases was primarily in compensation of employees, reflecting a slowdown in State and local employment, and in “other services,” reflecting a turnaround in prices of these services. Structures accelerated, largely reflecting a turnaround in highway construction. 

# NATIONAL INCOME AND PRODUCT ACCOUNTS

## Selected NIPA Tables

New estimates in this issue: "Preliminary" estimates for the second quarter of 1995.

The selected set of NIPA tables shown in this section presents quarterly estimates, which are updated monthly. (In most tables, the annual estimates are also shown.) These tables are available on the day of the gross domestic product (GDP) news release on printouts and diskettes on a subscription basis or from the Commerce Department's Economic Bulletin Board. For order information, write to the National Income and Wealth Division (BE-54), Bureau of Economic Analysis, Washington, DC 20230 or call (202) 606-9700.

Tables containing the estimates for 1929-87 are available in the two-volume set *National Income and Product Accounts of the United States*; see [inside back cover](#) for order information. For 1988-93, the complete official time series of NIPA estimates can be found as follows:

	1988	1989	1990	1991-93

Tables 3.15-3.20 and 9.1-9.6...	"	Sept. 1992 SURVEY	"	Sept. 1994 SURVEY
Tables 7.1, 7.2, 7.3, and 8.1....	Aug. 1994 SURVEY	Aug. 1994 SURVEY	Aug. 1994 SURVEY	Aug. 1994 SURVEY
Tables 7.4-7.12.....	Apr. 1993 SURVEY	Apr. 1993 SURVEY	Aug. 1993 SURVEY	July 1994 SURVEY

Summary NIPA series back to 1929 are in the September 1994 issue of the SURVEY. Errata to published NIPA tables appear in the September 1992, April 1993, October 1993, March 1994, November 1994, and April 1995 issues. NIPA tables are also available, most beginning with 1929, on diskettes. For more information on the presentation of the estimates, see ["A Look at How BEA Presents the NIPA's"](#) in the February 1995 SURVEY.

NOTE.—This section of the SURVEY is prepared by the National Income and Wealth Division and the Government Division.

Nonfarm inventories to final sales of goods and structures .....	4.12	4.19	4.19	4.21	4.26	4.32

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in business inventories (CBI) component of GDP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas CBI is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and general government and includes a small amount of final sales by farm.

Implicit price deflator .....	123.0	126.1	124.9	125.6	126.5	127.4	128.8	130.0

NOTE.—The quantity and price indexes in this table are calculated from weighted averages of the detailed output and prices used to prepare each aggregate and component. The fixed-weighted measures use as weights the composition of output in 1987. For the alternative indexes, the chain-type indexes with annual weights use weights for the preceding and current years, and the indexes with benchmark-years weights use weights of 1959, 1963, 1967, 1972, 1977, 1982, 1987, 1992, and the most recent year. Percent changes from preceding period for selected items in this table are shown in table 8.1.

**Table 7.2.—Fixed-Weighted and Alternative Quantity and Price Indexes for Gross Domestic Product, Final Sales, and Purchases**

[Index numbers, 1987=100]

1. Equals GDP less change in business inventories.

2. Equals GDP less net exports of goods and services or equals the sum of personal consumption expenditures, gross private domestic investment, and government purchases.

3. Equals gross domestic purchases less change in business inventories or equals the sum of personal consumption expenditures, gross private domestic fixed investment, and government purchases.

NOTE.—Percent changes from preceding period for selected items in this table are shown in table 8.1.

1987 dollars .....	1.5	3.6	3.4	3.5	3.1	7.5	4.1	-1.1

NOTE.—Except for disposable personal income, the quantity and price indexes in this table are calculated from weighted averages of the detailed output and prices used to prepare each aggregate and component. The fixed-weighted measures use as weights the composition of output in 1987. For the alternative indexes, the chain-type indexes with annual weights use weights for the preceding and current years, and the indexes with benchmark-years weights use weights of 1959, 1963, 1967, 1972, 1977, 1982, 1987, 1992, and the most recent year.

Percent change

Percent change

Percent change

Billion \$

Percent change

Percent

1. Percent change at annual rate from preceding quarter; based on seasonally adjusted estimates.

2. Seasonally adjusted annual rate; IVA is inventory valuation adjustment, and CCAdj is capital consumption adjustment.

3. Personal saving as percentage of disposable personal income; based on seasonally adjusted estimates.

Reconciliation and Other Special Tables

Table 1.—Reconciliation of Changes in BEA-Derived Compensation Per Hour with BLS Average Hourly Earnings  
[Percent change from preceding period]

	Seasonally adjusted at annual rates						
	1992	1993	1994	1994		1995	
				III	IV	I <sup>r</sup>	II <sup>p</sup>
<b>BEA-derived compensation per hour of all persons in the nonfarm business sector (less housing) ..</b>	<b>5.1</b>	<b>3.3</b>	<b>3.2</b>	<b>3.1</b>	<b>3.5</b>	<b>4.1</b>	<b>4.1</b>

<b>Addendum:</b>							
BLS estimates of compensation per hour in the nonfarm business sector <sup>2</sup> .....	5.1	3.3	3.1	3.1	4.0	2.8	2.7

<sup>r</sup> Preliminary.  
<sup>p</sup> Revised.  
1. Includes BEA use of non-BLS data and differences in detailed weighting. Annual estimates also include differences in BEA and BLS benchmarking procedures; quarterly estimates also include differences in seasonal adjustment procedures.  
2. These estimates differ from the BEA-derived estimates (first line) because the BLS estimates

include compensation and hours of tenant-occupied housing.  
NOTE.—The table does not incorporate the annual BLS revisions released in June 1995. The BLS revisions will be incorporated following the release of the comprehensive revision of the national income and product accounts scheduled for late 1995.  
BLS Bureau of Labor Statistics

<sup>p</sup> Preliminary.  
<sup>r</sup> Revised.  
1. Disposable personal income in 1987 dollars equals the current-dollar figure divided by the implicit price deflator for personal consumption expenditures.

2. Monthly estimates equal the centered 3-month moving average of personal saving as a percentage of the centered 3-month moving average of disposable personal income.

# State Personal Income, Revised Estimates for 1992-94

**T**HIS ARTICLE presents revised annual estimates of State personal income for 1992-94.<sup>1</sup> It summarizes the sources and effects of the revisions and provides brief definitions of total and disposable personal income. As presented in tables 1-3, the revised estimates provide State-by-State information on total and per capita personal income, on total and per capita disposable personal income, and on personal income by major source and on earnings by industry.

The annual revision of State personal income incorporates newly available source data that are used in the derivation of national "control totals," as well as of the State-level distributions of the control totals, for several of the components of State personal income. For wages and salaries and other labor income, the new source data are unemployment insurance (UI) tabulations of wages and salaries for the fourth quarter of 1994.<sup>2</sup>

1. The estimates presented in this article update and extend those presented in the volume *State Personal Income, 1929-93*, which also includes a description of the methodology used to estimate State personal income. (For order information, see the [inside back cover](#) of this issue.)

2. The estimates of wages and salaries for 1994 that were included in the preliminary annual estimates of State personal income presented in the April 1995 SURVEY OF CURRENT BUSINESS were based on the UI tabulations for

For farm proprietors' income, the new source data are the revised 1992-93 national and State estimates of farm income from the U.S. Department of Agriculture (USDA) and USDA estimates of farm income for 1994.

The estimates of personal income in the national income and product accounts (NIPA's)—which serve as the primary basis for the national control totals that are used in deriving the State estimates—are usually revised each July to incorporate newly available source data, such as the data on wages and salaries.<sup>3</sup> However, because this year's annual NIPA revision will be combined with the comprehensive NIPA revision scheduled for release in late 1995, the new source data have not yet been incorporated. Thus, the NIPA estimates that were used in the derivation of the

only the first three quarters of the year. For the preparation of the quarterly estimates of State personal income that were presented in "[Personal Income by State and Region, First Quarter 1995](#)" in the July 1995 SURVEY, the estimates of wages and salaries were revised on an interim basis to reflect the UI data for the fourth quarter of 1994. For information about the release schedule for the annual State estimates, see the box "[Release Schedule for the Annual Estimates of State and Local Area Personal Income](#)" on page 36.

Additional, small revisions were made to the estimates of wages and salaries for the preparation of the estimates presented in this article.

3. For more information, see the box "[BEA Estimates of Wages and Salaries for 1994](#)" on page 7 of the July 1995 SURVEY.

## Acknowledgments

The revised estimates of State personal income were prepared by the Regional Economic Measurement Division under the direction of Robert L. Brown, Chief. The preparation of the estimates was a divisionwide effort.

Estimates of nonfarm labor earnings (wages and salaries and other labor income) were prepared by the Regional Wage Branch under the supervision of Sharon C. Carnevale, Chief. Major responsibilities were assigned to Elizabeth P. Cologer, Lisa C. Ninomiya, Michael G. Pilot, John A. Rusinko, and James M. Scott. Contributing staff members were Lisa A. Bradburn, Susan P. Den Herder, Elizabeth A. Freeman, Lela S. Lester, Russell C. Lusher, Richard A. Lutyk, Paul K. Medzerian, Jeff L. Nielson, Adrienne T. Pilot, Mauricio Ortiz, Michael Phillips, William E. Reid, Jr., Lori A. Riegert, Victor A. Sahadachny, and Jaime Zenzano.

Estimates of farm earnings (wages and salaries, other labor income, and proprietors' income) and the residence adjustments were prepared by the Quarterly Income Branch. Major responsibilities were assigned to James

M. Zavrel. Contributing staff members were Elaine M. Briccetti, Carrie L. Case, Daniel R. Corrin, Michael S. Wagner, and Daniel Zabronsky.

Estimates of nonfarm proprietors' income, property income, transfer payments, and personal contributions for social insurance were prepared by the Proprietors' Income Branch. Major responsibilities were assigned to Charles A. Jolley. Contributing staff members were Sean P. Collier, Toan A. Ly, Ellen M. Wright, and Marianne A. Ziver.

The public use tabulations and data files were assembled and the text and tables for this article were prepared by the Regional Economic Information System Branch. Major responsibilities were assigned to Kathy A. Albettski, Wallace K. Bailey, and Gary V. Kennedy. Contributing staff members were H. Steven Dolan, Jeffrey L. Newman, Michael J. Paris, Albert Silverman, Nancy E. Smith, Callan S. Swenson, Monique B. Tyes, and Mary C. Williams.

Equals: Personal income .....	2.4	2.3	-28.8

national totals presented in this article are from the 1994 annual revision of the NIPA's, which was presented in the July 1994 SURVEY OF CURRENT BUSINESS, and from the quarterly NIPA estimates for 1994. For the derivation of the national control totals of the State estimates, these NIPA estimates were supplemented with the new source data.

Table A shows the differences between the national control totals of the components of the State estimates of personal income presented in "Total and Per Capita Personal Income by State and Region" in the April 1995 SURVEY and those presented in this article. The revisions to the national totals for 1992–93 were quite small, but the national total for 1994 was revised down \$28.8 billion, mainly reflecting the use of the UI tabulations for the fourth quarter for the estimates of wages and salaries.

In addition to the revised national control totals and the new State-level data for wages and salaries, other labor income, and farm proprietors' income, the annual revision of State personal income also incorporates State-level source data for the other components of personal income; these data are more current and more detailed and correspond more directly to the income components than the data used previously. The State-level revisions affect the distribution of the national control totals to the States. For non-farm proprietors' income, the 1992–94 estimates are now partly based on newly available data for 1992 on the number of small establishments by industry from the Census Bureau's *County Business Patterns*. For property income (dividends, interest, and rent), the 1993–94 estimates are now mainly based on newly available Internal Revenue Service tabulations of individual income tax returns for 1993. For transfer payments, the 1994 estimates are now mainly based on newly available data for 1994 on the benefits provided to individuals under Federal and State programs; the data are from the agencies that administer the programs. For personal contributions for social insurance, the 1992–94 estimates are now mainly based on newly available data for 1992 on social security taxes from the Social Security Administration.

Table B presents the previously published and revised annual estimates of State personal income and the amounts of the revisions for 1992–94. For all 3 years, the revisions to the estimates

**Release Schedule for the Annual Estimates of State and Local Area Personal Income**

The annual estimates of total and per capita personal income and of total and per capita disposable personal income for States for a given year are prepared in two steps. First, in April, preliminary estimates for the preceding year that are derived from the quarterly estimates for that year are prepared. For wages and salaries, unemployment insurance (UI) data for the first three quarters are used in the preparation of the estimates. Second, in August, the preliminary estimates are superseded by estimates that are more detailed and more reliable because they are derived from source data that are more current, more detailed, and otherwise more pertinent than the data that were used to prepare the quarterly estimates and the preliminary annual estimates. For wages and salaries, UI data for all four quarters are used.

The following April, the annual estimates for the year are revised in order to incorporate any newly available data that are used to prepare the county estimates of personal income for that year. The annual estimates for a year are routinely revised again for 2 more years.

The State estimates are revised in August and in April, and the county estimates are revised in April; each revision incorporates newly available source data. These routine revisions are completed 3 years after the preliminary State estimates were prepared and 2 years after the county estimates were prepared.

In addition, the State and county estimates may be revised again either to incorporate a comprehensive revision of the national income and product accounts (NIPA's) or to incorporate State- or county-level source data that are available less frequently than biennially. For example, in April 1994, the estimates for 1981–92 were revised to incorporate journey-to-work data from the 1990 Census of Population, selected data on production expenses from the 1987 Census of Agriculture, and data on the income of sole proprietorships and partnerships for 1987–89 from the Internal Revenue Service.

The comprehensive NIPA revision that is scheduled for release in late 1995 will be fully incorporated into the State estimates of personal income in August 1996.

of personal income for some of the States were substantial.

For 1992–93, the estimates of personal income for all the States in the Rocky Mountain region were revised up, mainly because of upward revisions to property income; for 1993, the revisions for the region and for all the States except Colorado were substantial. In the Plains region, sharp upward revisions to farm proprietors' income led to substantial revisions to the estimates of personal income for Iowa, North Dakota, and South Dakota. South Dakota was the only State in the Nation with revisions of 1.5 percent or greater in 1992–93.

For 1994, the effect of the downward revision to the national estimate of wages and salaries was pervasive. The estimates of personal income for all of the regions except the Rocky Mountain region were revised down. For the Rocky Mountain region, the downward revision to wages and salaries was more than offset by an upward revision to property income. The effect of the revision to wages and salaries was greatest in the Mideast and Great Lakes regions, where the personal income estimates for all the States except Delaware were revised down; the downward re-

visions to the two regional totals and to most of the States were substantial. For Delaware, the downward revision to wages and salaries was more than offset by upward revisions to nonfarm proprietors' income and to property income.

Only three States had revisions larger than 1.5 percent in 1994: For Nebraska, an upward revision was caused mainly by revisions to farm proprietors' income and to property income; for the District of Columbia, a downward revision was caused mainly by revisions to personal contributions for social insurance and to property income; and for Alaska, a downward revision was caused mainly by revisions to nonfarm proprietors' income and to transfer payments.

### *Definition of total and disposable personal income*

The personal income of a State is defined as the income received by, or on behalf of, all the residents of the State. It consists of the income received by persons from all sources—that is, from participation in production, from both government and business transfer payments, and from government interest (which is treated like a transfer payment). "Persons" consists of

### Data Availability

The State personal income estimates presented here, as well as more detailed tabulations and estimates, are available on magnetic tape, printouts, and diskettes. Tables of total and per capita personal income are available for 1929–94, and tables of total and per capita disposable personal income are available for 1948–94.

Detailed estimates of personal income by major source and of earnings by industry are available for 1929–94. Tables for 1958–94 present labor and proprietors' earnings at the Standard Industrial Classification (SIC) two-digit level (for example, food stores) based on the 1967 SIC for 1958–74, on the 1972 SIC for 1975–87, and on the 1987 SIC for 1988–94. Tables for 1929–57 present earnings at the SIC division level (for example, total retail trade) based on the 1967 SIC.

Supplemental tables are available for *wages and salaries* by SIC two-digit industry for 1958–94 and by SIC industry division for 1929–57, *employment* (either including or excluding self-employment) by SIC two-digit industry for 1969–94, *transfer payments* by major program for 1948–94, *farm income and expenses* (including broad categories of gross receipts and expenses of all farms and four different measures of net farm income) for 1969–94, and *personal tax and nontax payments* by level of government and by type for 1948–94.

A magnetic tape containing a complete set of the State annual estimates costs \$100. Printouts are priced by the number of pages, and diskettes by the number of

diskettes; thus, the cost of an order depends on the number of series, areas, and years of data ordered. There is a minimum charge of \$10.00 per order.

The State estimates of personal income and employment for 1969–93—in somewhat less detail than that described above—are also available on the Regional Economic Information System CD-ROM for \$35. However, the State estimates for 1992–93 on this CD-ROM have been superseded by the revised estimates presented in this article. (The CD-ROM is updated annually; the latest update was released in May 1995.) The CD-ROM also contains the entire set of estimates of personal income and employment for counties and metropolitan areas for 1969–93.

Quarterly estimates of State personal income—including estimates of wages and salaries and earnings by SIC division—are available for 1969–94 and for the first quarter of 1995 on printouts and on a diskette. However, the quarterly estimates for 1992–94 will not be made consistent with the revised annual estimates until October 1995.

For further information or to place an order, e-mail [reis.remd@bea.doc.gov](mailto:reis.remd@bea.doc.gov), call (202) 606-5360, or write to the Regional Economic Information System, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230. Visa or Mastercard are accepted for telephone orders.

individuals, nonprofit institutions that primarily serve individuals, private noninsured welfare funds, and private trust funds.

Personal income is calculated as the sum of wage and salary disbursements, other labor income, proprietors' income, rental income of persons, personal dividend income, personal interest income, and transfer payments to persons, less personal contributions for social insurance. State per capita personal income is calculated as the personal income of the residents of a State divided by the midyear resident population of the State.

Disposable personal income is the income available to persons for spending or saving; it is calculated as personal income less personal tax and nontax payments. Personal tax and nontax payments consists of tax payments that are not chargeable to business expense and of certain other payments to government agencies (except government enterprises) that are treated

like taxes. Personal taxes includes taxes on income, including realized net capital gains, taxes on transfers of estates and gifts, and taxes on personal property. Personal nontaxes includes donations and fees, fines, and forfeitures. State per capita disposable personal income is calculated as the disposable personal income of the residents of a State divided by the midyear resident population of the State.

These definitions are essentially the same as those underlying the personal income estimates in the NIPA's. However, the State estimates of personal income exclude the labor earnings (that is, wages and salaries and other labor income less personal contributions for social insurance by employees) of U.S. residents who are temporarily working and living abroad (mainly Federal Government personnel), whereas the NIPA estimates include these labor earnings.

<sup>r</sup> Revised.

1. The personal income level shown for the United States is derived as the sum of the State estimates; it differs from the national income and product accounts (NIPA) estimate of personal income because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily.

porarily by private U.S. firms. It can also differ from the NIPA estimate because of different data sources and revision schedules.

2. Per capita personal income was computed using midyear population estimates of the Bureau of the Census. Estimates for 1990-94 reflect State population estimates available as of February 1995.

Table 2.—Total and Per Capita Disposable Personal Income by State and Region, 1989–94

State and region	Total								Per capita <sup>1</sup>

*Marketing Specialists, Government Officials, Researchers . . .  
If you need economic data on the States, you need this!*

# STATE PERSONAL INCOME: 1929-93

## 65 YEARS OF ECONOMIC DATA—ALL IN ONE PLACE

The information in *State Personal Income* offers a unique opportunity to assess the performance of each State's economy from the Great Depression to the 1990's. These comprehensive personal income estimates for all 50 States are found in *no other publication*.

## DETAILED ESTIMATES AT YOUR FINGERTIPS

This handy publication presents the following estimates for each State, for eight regions, and for the United States:

- Annual total and per capita personal income for 1929-93
- Annual total and per capita disposable personal income for 1948-93
- Detailed estimates of personal income by major type of payment and by industry for 1929-93
- Quarterly total personal income for 1969-93

Maps and charts bring the whole array of estimates into focus. A methodology section describes the sources and methods used in preparing the estimates.

## HOW ARE THESE ESTIMATES USED?

BEA's personal income estimates are used for market research, government budgets and programs, plant location studies, economic planning and forecasting, economic research, environmental impact statements, prospectuses for government bond offerings, and much more.

**ORDER YOUR COPY OF THIS BRAND NEW PUBLICATION TODAY!**

Estimates are also available on diskette, printout, and tape from BEA. For more information, call (202) 606-5360.

# Foreign Direct Investment in the United States: Detail for Historical-Cost Position and Related Capital and Income Flows, 1994

THE FOLLOWING SET of tables presents detailed estimates of the foreign direct investment position in the United States on a historical-cost, or book-value, basis and of the related capital and income flows. These tables supplement an article in the June 1995 SURVEY OF CURRENT BUSINESS that summarized developments in the direct investment positions at historical cost in 1994.<sup>1</sup> Tables 16 and 17 show estimates of the position, capital flows, and income at the most detailed levels possible—that is, for every country from which there was investment and for every industry in which investment was made. Estimates for 1994 are preliminary; those for 1991–93 are revised.

The estimates in tables 3–18 differ in two respects from those for comparable items included in the international investment position of the United States and in the U.S. international transactions accounts.<sup>2</sup> First, the estimates in tables 3–18 are on a historical-cost basis, which is the only basis on which detailed estimates by country and industry are available; in contrast, the aggregate estimates of the direct investment position that are included in the international investment position of the United States are presented on both a current-cost and a market-value basis, and the aggregate

estimates of direct investment income and capital flows that are included in the U.S. international transactions accounts are presented on a current-cost basis. Second, the estimates of direct investment income and services that appear in tables 3–18, unlike those in the U.S. international transactions accounts, are net (after deduction) of U.S. and foreign withholding taxes; estimates gross of withholding taxes are not available by country or by industry.

Table 1 shows the total foreign direct investment position in the United States and a comparable rate of return on the position on all three valuation bases (historical cost, current cost, and market value); table 2 reconciles the estimates presented in tables 3–18 with those included in the U.S. international transactions accounts.

Tables 1 through 18 follow. 

1. See “Direct Investment Positions on a Historical-Cost Basis, 1994: Country and Industry Detail,” SURVEY OF CURRENT BUSINESS 75 (June 1995): 61–68.  
2. See “The International Investment Position of the United States in 1994,” and “U.S. International Transactions, First Quarter 1995,” SURVEY 75 (June 1995): 52–60 and 76–117.

The survey from which the estimates were derived was conducted by Gregory G. Fouch under the supervision of James L. Bomkamp. Peter J. Fox, Nancy F. Halverson, Tracy K. Leigh, Beverly E. Palmer, and Linden L. Webber assisted with the processing of the survey and with the preparation of the estimates. D. Richard Mauery programmed the tables.

## Industry Name Changes

Several name changes have been made to the industries shown in the stub of table 17. In this table, “machinery, except electrical” is now designated “industrial machinery and equipment,” and “electric and electronic equipment” is now designated “electronic and other electric equipment.” Additionally, “machinery, except electrical, nec” has been changed to “industrial machinery and equipment, nec,” and “electric and electronic equipment, nec” has been changed to “electronic and other electric equipment, nec.”

These changes were made to conform with the nomenclature used in the 1987 Standard Industrial Classification. For foreign direct investment in the United States, the substance of these changes had already been reflected in the detailed estimates of the historical-cost position and related capital and income flows, beginning with the 1987 benchmark survey of foreign direct investment in the United States.

**Table 1.—Alternative Position and Rate-of-Return Estimates for Foreign Direct Investment in the United States, 1992–94**

Valuation method	Millions of dollars								
	Position at yearend 1992	Changes in 1993 (decrease (–))			Position at yearend 1993	Changes in 1994 (decrease (–))			Position at yearend 1994

Market value .....	694,212	65,250	41,108	24,142	759,462	11,628	49,448	–37,820	771,090

Valuation method	Millions of dollars							Percent		
	Direct investment income			Direct investment position at yearend				Rate of return		
	1992	1993	1994	1991	1992	1993	1994	1992	1993	1994
Historical cost <sup>1</sup> .....	1,604	5,881	23,239	419,108	427,566	464,110	504,401	0.4	1.3	4.8
Current cost <sup>2</sup> .....	317	5,250	22,621	491,942	498,599	535,805	580,503	.1	1.0	4.1
Market value <sup>3</sup> .....	–8,033	868	13,474	669,137	694,212	759,462	771,090	–1.2	.1	1.8

1. On a historical-cost basis, direct investment income excludes capital gains and losses and is computed without a current-cost adjustment to earnings; it equals the sum of lines 9 and 14 of table 2. The rate of return based on historical cost equals this measure of income divided by the average of the beginning- and end-of-year historical-cost direct investment positions. In accordance with international guidelines, this measure of income, like the other measures shown in this table, is recorded gross (before deduction) of U.S. and foreign withholding taxes on distributed earnings and interest. However, it differs from the measure disaggregated by country and industry in subsequent tables, which is recorded net (after deduction) of withholding taxes, because withholding tax data are not available by country or industry.

2. On a current-cost basis, direct investment income excludes capital gains and losses and includes a current-cost adjustment to earnings; the latter revalues depreciation, depletion, and expensed exploration and development

costs to reflect current-period prices, as required for the national and international economic accounts. Income on a current-cost basis equals line 1 of table 2. The rate of return based on current cost equals this measure of income divided by the average of the beginning- and end-of-year current-cost direct investment positions.

3. On a market-value basis, direct investment income measures financial return to investors; thus, it includes capital gains and losses but excludes the current-cost adjustment, which is an economic accounting adjustment, and currency translation adjustments, which in company financial statements are taken directly to an equity account without passing through the income statement. It is derived as line 1 minus line 8 of table 2, plus the part of the total in column 11 of table 5 that represents capital gains and losses other than currency translation adjustments. The rate of return based on market value equals this measure of income divided by the average of the beginning- and end-of-year direct investment positions at market value.

39 U.S. affiliates' receipts (IT table 1, part of line 9, also shown in the accompanying tables) .....	6,101	5,748	6,450

1. Withholding taxes on "other" services transactions between U.S. affiliates and their foreign parent groups are assumed to be negligible, and no estimates of them are made. Therefore, there is no difference between the before-tax estimates shown in the international transactions accounts and the after-tax estimates shown in the accompanying tables.

NOTE.—This table reconciles the estimates for which country and industry detail are presented in this report with the aggregate estimates presented in the U.S. international transactions accounts in the June 1995 Survey of Current Business (see "U.S. International Transactions, First Quarter, 1995," Survey 75 (June 1995): 76–117). In the international transactions accounts, the earnings component of direct investment income and the reinvested earnings component of capital inflows are adjusted to a current-cost basis, and direct investment current-account items are adjusted to be gross (before deduction) of U.S. and foreign withholding taxes. These adjustments are not made to the estimates in tables 3–18 in this report, because the source data needed to make the adjustments by country and industry are not available.

1. Reinvested earnings divided by earnings.

2. Reinvestment ratio is not defined because reinvested earnings are negative.

NOTE.—In this table, distributed earnings are shown before deduction of withholding taxes. Unlike in the international transactions accounts, earnings and reinvested earnings are shown here without a current-cost adjustment.

<sup>1</sup> Prior to 1993, the European Union was known as the European Communities (12). In 1993-94, the European Union comprised Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, and the United Kingdom. At the beginning of 1995, the Union was enlarged to include Austria, Finland, and

Sweden, but data for these countries are not included in this line.

<sup>2</sup> OPEC is the Organization of Petroleum Exporting Countries. Since 1993, its members have been Algeria, Gabon, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates, and Venezuela. Prior to 1993, Ecuador was also a member of OPEC.

<sup>1</sup> Less than \$500,000 ( $\pm$ ).

<sup>2</sup> Suppressed to avoid disclosure of data of individual companies.

1. The ultimate beneficial owner is that person, proceeding up a U.S. affiliate's ownership chain, beginning with and including the foreign parent, that is not owned more than 50 percent by another person. The country of ultimate beneficial owner is often the same as that of the foreign parent, but it may be a different foreign country or the

United States.

2. See footnote 1, table 10.3.

3. See footnote 2, table 10.3.

NOTE.—In this table, unlike in the international transactions accounts, income is shown net of withholding taxes and without a current-cost adjustment.

## U.S. Direct Investment Abroad: Detail for Historical-Cost Position and Related Capital and Income Flows, 1994

THE FOLLOWING SET of tables presents detailed estimates of the U.S. direct investment position abroad on a historical-cost, or book-value, basis and of the related capital and income flows. These tables supplement an article in the June 1995 SURVEY OF CURRENT BUSINESS that summarized developments in the direct investment positions at historical cost in 1994.<sup>1</sup> Tables 17 and 18 show estimates of the position, capital flows, and income at the most detailed levels possible—that is, for every country and for every industry in which investment was made. Estimates for 1994 are preliminary; those for 1992–93 are revised.

The estimates in tables 3–18 differ in two respects from those for comparable items included in the international investment position of the United States and in the U.S. international transactions accounts.<sup>2</sup> First, the estimates in tables 3–18 are on a historical-cost basis, which is the only basis on which detailed estimates by country and industry are available; in contrast, the aggregate estimates of the direct investment position that are included in the international investment position of the United States are presented on both a

The survey from which the estimates were derived was conducted by Mark W. New under the supervision of Patricia C. Walker. Laura A. Downey, Marie K. Laddomada, Sherry Lee, Leila C. Morrison, Gary M. Solamon, and Dwayne Torney assisted with the processing of the survey and with the preparation of the estimates. Smith W. Allnutt III programmed the tables.

current-cost and a market-value basis, and the aggregate estimates of direct investment income and capital flows that are included in the U.S. international transactions accounts are presented on a current-cost basis. Second, the estimates of direct investment income and services that appear in tables 3–18, unlike those in the U.S. international transactions accounts, are net (after deduction) of U.S. and foreign withholding taxes; estimates gross of withholding taxes are not available by country or by industry.

Table 1 shows the total U.S. direct investment position abroad and a comparable rate of return on the position on all three valuation bases (historical cost, current cost, and market value); table 2 reconciles the estimates presented in tables 3–18 with those included in the U.S. international transactions accounts.

Tables 1 through 18 follow. 

1. See “Direct Investment Positions on a Historical-Cost Basis, 1994: Country and Industry Detail,” SURVEY OF CURRENT BUSINESS 75 (June 1995): 61–68.

2. See “The International Investment Position of the United States in 1994,” and “U.S. International Transactions, First Quarter 1995,” SURVEY 75 (June 1995): 52–60 and 76–117.

### Revisions to Estimates of the U.S. Direct Investment Position Abroad for 1983–88

The estimates of the U.S. direct investment position abroad and the related estimates of income receipts, capital outflows, and services transactions for 1983–88 have been revised to incorporate information from BEA’s 1989 benchmark survey, or census.

A complete set of tables containing the revised estimates for 1983–88 will be published later this year. The availability of this publication will be announced on the inside back cover of the SURVEY OF CURRENT BUSINESS. For details about the revisions to income receipts, capital outflows, and services transactions, see “U.S. International Transactions, Revised Estimates for 1983–94” in the June 1995 SURVEY OF CURRENT BUSINESS. For details about the revisions to the direct investment position, see “Direct Investment Positions on a Historical-Cost Basis, 1994: Country and Industry Detail,” also in the June SURVEY.

### Industry Name Changes

Several name changes have been made to the industries shown in the headings of tables 11.1–16.3 and in the stub of table 18. In these tables, “machinery, except electrical” is now designated “industrial machinery and equipment,” and “electric and electronic equipment” is now designated “electronic and other electric equipment.” Additionally, in table 18, “machinery, except electrical, nec” has been changed to “industrial machinery and equipment, nec,” and “electric and electronic equipment, nec” has been changed to “electronic and other electric equipment, nec.”

These changes were made to conform with the nomenclature used in the 1987 Standard Industrial Classification. For U.S. direct investment abroad, the substance of these changes had already been reflected in the detailed estimates of the historical-cost position and related capital and income flows, beginning with the 1989 benchmark survey of U.S. direct investment abroad.

1. On a historical-cost basis, direct investment income excludes capital gains and losses and is computed without a current-cost adjustment to earnings; it equals the sum of lines 9 and 14 of table 2. The rate of return based on historical cost equals this measure of income divided by the average of the beginning- and end-of-year historical-cost direct investment positions. In accordance with international guidelines, this measure of income, like the other measures shown in this table, is recorded gross (before deduction) of U.S. and foreign withholding taxes on distributed earnings and interest. However, it differs from the measure disaggregated by country and industry in subsequent tables, which is recorded net (after deduction) of withholding taxes, because withholding tax data are not available by country or industry.

2. On a current-cost basis, direct investment income excludes capital gains and losses and includes a current-cost adjustment to earnings; the latter revalues depreciation, depletion, and expensed exploration and development

costs to reflect current-period prices, as required for the national and international economic accounts. Income on a current-cost basis equals line 1 of table 2. The rate of return based on current cost equals this measure of income divided by the average of the beginning- and end-of-year current-cost direct investment positions.

3. On a market-value basis, direct investment income measures financial return to investors; thus, it includes capital gains and losses but excludes the current-cost adjustment, which is an economic accounting adjustment, and currency translation adjustments, which in company financial statements are taken directly to an equity account without passing through the income statement. It is derived as line 1 minus line 8 of table 2, plus the total in column 12 of table 5. The rate of return based on market value equals this measure of income divided by the average of the beginning- and end-of-year direct investment positions at market value.

1. Withholding taxes on "other" services transactions between U.S. parents and their foreign affiliates are assumed to be negligible, and no estimates of them are made. Therefore, there is no difference between the before-tax estimates shown in the international transactions accounts and the after-tax estimates shown in the accompanying tables.

NOTE.—This table reconciles the estimates for which country and industry detail are presented in this report with the aggregate estimates presented in the U.S. international transactions accounts in the June 1995 Survey of Current Business (see "U.S. International Transactions, First Quarter, 1995," Survey 75 (June 1995): 76–117). In the international transactions accounts, the earnings component of direct investment income and the reinvested earnings component of capital outflows are adjusted to a current-cost basis, and direct investment current-account items are adjusted to be gross (before deduction) of U.S. and foreign withholding taxes. These adjustments are not made to the estimates in tables 3–18 in this report, because the source data needed to make the adjustments by country and industry are not available.

\* Less than \$500,000 (±).

<sup>D</sup> Suppressed to avoid disclosure of data of individual companies.

1. An increase in U.S. parents' payables is a decrease in intercompany debt and, thus, a capital inflow.

2. Represents gains or losses that arise because of changes from the end of one accounting period to the next

in exchange rates applied in translating affiliates' assets and liabilities from foreign currencies into dollars.

NOTE.—In this table, unlike in the international transactions accounts, reinvested earnings are shown without a current-cost adjustment.

\* Less than \$500,000.

<sup>2</sup> Suppressed to avoid disclosure of data of individual companies.

1. Includes capital stock, additional paid-in capital and retained earnings, and cumulative translation adjustments.

2. An increase in U.S. parents' payables is a decrease in intercompany debt and, thus, a capital inflow.

NOTE.—This table shows transactions with, and positions in, affiliates primarily established to borrow funds abroad and relend them to their U.S. parents. In this table, unlike in the international transactions accounts, income and interest are shown net of withholding taxes, and income, earnings, reinvested earnings, and capital outflows are shown without a current-cost adjustment.

\* Less than \$500,000.

D Suppressed to avoid disclosure of data of individual companies.

1. Consists of service charges, rentals for the use of tangible property, and film and television tape rentals. In 1994, U.S. parents' receipts of service charges were \$9,369 million, receipts of rentals for the use of tangible property

were \$533 million, and receipts of film and television tape rentals were \$863 million; U.S. parents' payments were \$5,409 million, \$184 million, and less than \$500 thousand, respectively.

NOTE.—In this table, unlike in the international transactions accounts, royalties and license fees and charges for other services are shown net of withholding taxes.

6. Prior to 1992, included data for Azerbaijan, Kazakhstan, Russia, Ukraine, and Uzbekistan. Prior to 1991, included data for Estonia, Latvia, and Lithuania.

7. Prior to 1992, included data for Croatia, Serbia, and Slovenia.

NOTE.—In this table, unlike in the international transactions accounts, income and capital outflows are shown without a current-cost adjustment, and income is shown net of withholding taxes.

L,C,Lg,U Cyclical indicator series are classified as L (leading), C (coincident), Lg (lagging), or U (unclassified) at reference cycle peaks, troughs, and overall. Series classifications are shown in parentheses following the series titles.

‡ Cyclical indicator series denoted by ‡ are inverted (i.e., the sign is reversed) for cyclical analysis calculations, including classifications, contributions to composite indexes, and current high values.

† Cyclical indicator series denoted by † are smoothed by an autoregressive-moving-average filter developed by Statistics Canada.

For information on composite indexes and other concepts used in this section, see "Business Cycle Indicators: Upcoming Revision of the Composite Indexes" in the October 1993 SURVEY OF CURRENT BUSINESS and "The Composite Index of Coincident Indicators and Alternative Coincident Indexes" in the June 1992 SURVEY. References to series in this section use the prefix "BCI-" followed by the series number. Unless otherwise noted, series are seasonally adjusted.

Percent change data are centered within the spans: 1-month changes are placed in the ending month, 3-month changes are placed in the 3d month, 6-month changes are placed in the 4th month, 1-quarter changes are placed in the ending quarter, and 4-quarter changes are placed in the 3d quarter.

Diffusion indexes are defined as the percent of components rising plus one-half of the percent of components unchanged. Diffusion index data are centered within the spans: 1-month indexes are placed in the ending month and 6-month indexes are placed in the 4th month.

High values reached by cyclical indicators in the expansion following the last reference cycle trough (March 1991) are shown in boldface type; high values reached prior to the period shown in the table are listed at the bottom of each page. For inverted series, low values are indicated as highs.

Sources for series in this section are shown on pages C-30 through C-32 in the April 1995 SURVEY.

Page C-1

- \* Preliminary August 1995 values: BCI-19 = 558.89 and BCI-109 = 8.75.
- 1. Data exclude Puerto Rico, which is included in figures published by the source agency.
- 2. Copyrighted. This series may not be reproduced without written permission from the University of Michigan, Survey Research Center, P.O. Box 1248, Ann Arbor, MI 48106-1248.
- 3. Excludes BCI-57, for which data are not available.
- 4. Excludes BCI-77 and BCI-95, for which data are not available.

- 1. Copyrighted. This series may not be reproduced without written permission from the University of Michigan, Survey Research Center, P.O. Box 1248, Ann Arbor, MI 48106-1248.
- 2. Copyrighted. This series may not be reproduced without written permission from the American Bankers Association, 1120 Connecticut Avenue, NW, Washington, DC 20036.

Page C-5

NOTE.—Major data revision: The index of industrial production for Canada (BCI-723) has been revised from 1990 forward to reflect the annual updating of the basic data and new seasonal adjustment factors. For further information, contact Statistics Canada, Measures and Analysis Division, Ottawa, Ontario K1A 0T6, Canada.

\* Preliminary August 1995 values: BCI-119 = 5.75, BCI-114 = 5.42, BCI-116 = 7.75, BCI-115 = 6.93, BCI-117 = 6.08, BCI-109 = 8.75, BCI-19 (1941-43=10) = 558.89, BCI-19 (1967=100) = 608.0, BCI-748 = 1,279.5, BCI-745 = 373.8, BCI-746 = 978.6, BCI-742 = 1,587.9, BCI-747 = 692.0, BCI-743 = 518.8, BCI-750 = 84.32, BCI-758 = 94.11, BCI-755 = 1.4406, BCI-756 = 4.9543, BCI-752 = 0.6367, BCI-757 = 1,602.71, and BCI-753 = 1.3584.

- 1. Balance of payments basis: Excludes transfers under military grants and Department of Defense sales contracts (exports) and Department of Defense purchases (imports).
- 2. Organisation for Economic Co-operation and Development.
- 3. This index is the weighted-average exchange value of the U.S. dollar against the currencies of the other G-10 countries plus Switzerland. Each country is weighted by its 1972–76 global trade. For a description of this index, see the August 1978 *Federal Reserve Bulletin* (p. 700).
- 4. This index is compiled by the Center for International Business Cycle Research (CIBCR), Graduate School of Business, Columbia University, New York, NY 10027.

- 1. Data exclude Puerto Rico, which is included in figures published by the source agency.
- 2. Copyrighted. This series may not be reproduced without written permission from F.W. Dodge, McGraw-Hill, Inc., 24 Hartwell Avenue, Lexington, MA 02173.

Page C-3

- \* Preliminary August 1995 value: BCI-23 = 339.2.
- 1. Copyrighted. This series may not be reproduced without written permission from Knight-Ridder Financial, 30 South Wacker Drive, Suite 1810, Chicago, IL 60606.

Page C-4

- \* Preliminary August 1995 values: BCI-122 = 101.0, BCI-123 = 93.5, and BCI-85 = 0.01.

Notes for Pages C-7 Through C-27

- The following notes explain general features of the charts that appear in this section:
- Business cycle peaks (P) and troughs (T), as designated by the National Bureau of Economic Research, Inc., are indicated at the top of each chart. The shaded areas represent recessions.
  - For each series classified as a cyclical indicator, the timing classifications at peaks, at troughs, and overall are shown in a box adjacent to the title. (L = leading, C = coincident, Lg = lagging, U = unclassified.) A complete list of series titles and sources is shown on pages C-30 through C-32 in the April 1995 SURVEY OF CURRENT BUSINESS.
  - *Arithmetic scales* are designated "Scale A." On the same arithmetic scale, equal vertical distances represent equal differences in data. (For example, the vertical distance from 10 to 15 is the same as the distance from 100 to 105.)
  - *Logarithmic (log) scales* are designated L-1, L-2, or L-3 to indicate their relative size. On log scales of the same size, equal vertical distances represent equal percentage changes. (For

- example, the vertical distance from 10 to 15 is the same as the distance from 100 to 150.) Compared with an L-1 scale, the same percentage change covers half the distance on an L-2 scale and one-third the distance on an L-3 scale.
- Data are monthly unless otherwise indicated. Quarterly data are indicated by a "Q" following the series title.
  - Some series include a centered moving average, which is shown as a heavy line superimposed on the actual monthly data.
  - Parallel lines across a plotted series indicate a missing data value, change in definition, or other significant break in continuity.
  - The box near the end of each plotted series indicates the latest data month (Arabic numeral) or quarter (Roman numeral) shown or, for series computed over a span of time (diffusion indexes and rates of change), the latest data period used in computing the series.

# Index to Historical Data for Selected Series

Some issues of the SURVEY provide historical data for selected Business Cycle Indicators series. The series for which historical data have been shown are listed below by subject, by series number, and by issue. Historical data for additional series will be shown, as space allows, in future issues.

Subject	Series number	Issue	Page	Subject	Series number	Issue	Page
Bank reserves:				Interest rates—Continued:			
Free reserves .....	93	1/95	C-34	Federal funds rate .....	119	11/94	C-42
Member bank borrowings from the Federal Reserve .....	94	1/95	C-34	Mortgage yield, secondary market .....	118	11/94	C-41
Business formation:				Municipal bond yield .....	117	11/94	C-41
Current liabilities of business failures .....	14	11/94	C-30	Treasury bill rate .....	114	11/94	C-39
Index of net business formation .....	12	11/94	C-29	Treasury bond yield .....	115	11/94	C-40
New business incorporations .....	13	11/94	C-29	International comparisons:			
Business loans:				Consumer price indexes:			
Commercial and industrial loans, current dollars .....	72	11/94	C-36	Canada (and changes) .....	733	1/95	C-39
Commercial and industrial loans, 1987 dollars .....	101	10/94	C-48	Federal Republic of Germany (and changes) .....	735	1/95	C-40
Net change in business loans .....	112	11/94	C-38	France (and changes) .....	736	1/95	C-41
Capacity utilization rates:				Italy (and changes) .....	737	1/95	C-42
Manufacturing .....	82	12/94	C-33	Japan (and changes) .....	738	1/95	C-43
Total industry .....	124	12/94	C-33	United Kingdom (and changes) .....	732	1/95	C-38
Capital investment:				Exchange rates:			
Contracts and orders for plant and equipment, 1987 dollars ...	20	10/94	C-38	Canada .....	753	12/94	C-42
Machinery and equipment sales and business construction expenditures.	69	1/95	C-33	Federal Republic of Germany .....	755	12/94	C-43
Composite indexes:				France .....	756	12/94	C-43
Coincident indicators (and changes) .....	920	10/94	C-30–31	Italy .....	757	12/94	C-44
Lagging indicators (and changes) .....	930	10/94	C-33–34	Japan .....	758	12/94	C-44
Leading indicators (and changes) .....	910	10/94	C-28–29	United Kingdom .....	752	12/94	C-42
Ratio, coincident index to lagging index .....	940	10/94	C-35	Weighted-average exchange value of U.S. dollar .....	750	12/94	C-41
Consumer attitudes:				Industrial production indexes:			
Index of consumer confidence .....	122	11/94	C-42	Canada .....	723	12/94	C-35
Index of consumer expectations <sup>1</sup> .....	123	11/94	C-43	Federal Republic of Germany .....	725	12/94	C-36
Index of consumer expectations <sup>2</sup> .....	83	10/94	C-43	France .....	726	12/94	C-36
Index of consumer sentiment .....	58	11/94	C-34	Italy .....	727	12/94	C-37
Consumer installment credit:				Japan .....	728	12/94	C-37

Total outstanding .....	66	11/94	C-35	Canada .....	743	12/94	C-39
Diffusion indexes:				Federal Republic of Germany .....	745	12/94	C-39
Coincident indicator components .....	951	10/94	C-32	France .....	746	12/94	C-40
Lagging indicator components .....	952	10/94	C-34–35	Italy .....	747	12/94	C-40
Leading indicator components .....	950	10/94	C-29–30	Japan .....	748	12/94	C-41
Employment:				United Kingdom .....	742	12/94	C-38
Average weekly hours, manufacturing .....	1	10/94	C-36	United States (1967=100) .....	19	12/94	C-38
Average weekly overtime hours, manufacturing .....	21	1/95	C-29	Inventories:			
Civilian employment .....	442	1/95	C-36	Manufacturing and trade, change .....	31	1/95	C-29
Civilian labor force .....	441	1/95	C-35	Manufacturing and trade, 1987 dollars .....	70	11/94	C-35
Diffusion index of employees on private nonagricultural payrolls.	963	1/95	C-44	Ratio, manufacturing and trade inventories to sales, 1987 dollars.	77	10/94	C-43
Employee hours in nonagricultural establishments .....	48	1/95	C-32	Labor cost per unit of output, manufacturing, index (and changes).	62	12/94	C-29–30
Employees in goods-producing industries .....	40	1/95	C-30	Money supply:			
Employees on nonagricultural payrolls .....	41	10/94	C-39	Change in money supply M1 .....	85	11/94	C-36
Index of help-wanted advertising .....	46	11/94	C-32	Change in money supply M2 .....	102	11/94	C-37
Participation rate, both sexes 16–19 years of age .....	453	1/95	C-37	Money supply M1, 1987 dollars .....	105	11/94	C-38
Participation rate, females 20 years and over .....	452	1/95	C-37	Money supply M2, 1987 dollars .....	106	10/94	C-48
Participation rate, males 20 years and over .....	451	1/95	C-36	New orders, consumer goods and materials, 1987 dollars .....	8	10/94	C-37
Persons engaged in nonagricultural activities .....	42	1/95	C-31	Prices:			
Ratio, civilian employment to population .....	90	1/95	C-33	Consumer Price Index, all items (and changes) .....	320	11/94	C-43–44
Housing:				Consumer Price Index for services (and changes) .....	120	10/94	C-49–50
Index of new private housing units authorized by local building permits.	29	10/94	C-38	Index of producer prices for sensitive crude and intermediate materials.	98	11/94	C-37
New private housing units started .....	28	11/94	C-31	Index of sensitive materials prices (and changes) .....	99	10/94	C-46–47
Income:				Index of spot market prices, raw industrial materials .....	23	11/94	C-30
Personal income less transfer payments, 1987 dollars .....	51	10/94	C-40	Sales:			
Personal income, 1987 dollars .....	52	11/94	C-33	Manufacturing and trade, 1987 dollars .....	57	10/94	C-41
Ratio, personal income to money supply .....	108	1/95	C-35	Retail stores, 1987 dollars .....	59	11/94	C-34
Wages and salaries in mining, manufacturing, and construction, 1987 dollars.	53	11/94	C-33	Stock price index, 500 common stocks .....	19	10/94	C-37
Industrial production indexes:				Unemployment:			
Business equipment .....	76	12/94	C-32	Average duration in weeks .....	91	10/94	C-44
Consumer goods .....	75	12/94	C-32	Average weekly initial claims for unemployment insurance .....	5	10/94	C-36
Defense and space equipment .....	557	12/94	C-34	Civilian unemployment rate .....	43	11/94	C-32
Durable manufactures .....	73	12/94	C-31	Number of persons unemployed .....	37	1/95	C-30
Non-durable manufactures .....	74	12/94	C-31	Ratio, help-wanted advertising to number unemployed .....	60	1/95	C-32
Total .....	47	12/94	C-29	Unemployment rate, 15 weeks and over .....	44	1/95	C-31
Interest rates:				Unfilled orders, durable goods, 1987 dollars (and changes) .....	92	10/94	C-44–45
Average prime rate charged by banks .....	109	10/94	C-49	Vendor performance, slower deliveries diffusion index .....	32	10/94	C-39
Corporate bond yield .....	116	11/94	C-40				

# BEA INFORMATION

BEA's economic information is available in publications, on computer tapes, on diskettes, and through a variety of other products and services. Most of these are described in *A User's Guide to BEA Information*. For a copy, write to the Public Information Office, BE-53, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 606-9900.

## Recent Publications from GPO

**ORDER FROM:** Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954. Payment may be by check (made payable to Superintendent of Documents) or charged to a GPO deposit account number, VISA, or MasterCard. Phone (202) 512-1800 or fax (202) 512-2250.

**National Income and Product Accounts of the United States.** (1992–93) Two volumes. Presents the full set of national income and product accounts (NIPA) estimates for 1929–88 that resulted from the most recent comprehensive, or benchmark, revision. Text describes the statistical conventions used in the NIPA's and the definitions and classifications underlying the accounts.

*Vol. 1: 1929–58.* 264 pp. \$15.00 (GPO STOCK NO. 003-010-00236-1).

*Vol. 2: 1959–88.* 424 pp. \$25.00 (GPO STOCK NO. 003-010-00231-0).

**Fixed Reproducible Tangible Wealth in the United States, 1925–89.** (1993) Contains annual estimates of the stock of privately owned and government-owned durable equipment and structures and of durable goods owned by consumers in the United States for 1925–89. Estimates are for fixed nonresidential private capital by major industry group, for residential capital by tenure group, for government-owned fixed capital by type of government, and for 11 types of durable goods owned by consumers. 460 pp. \$25.00. (GPO STOCK NO. 003-010-00235-2).

**Benchmark Input-Output Accounts of the United States, 1987.** (1994) Presents summary and detailed make and use tables for industries and commodities; tables showing commodity and industry output requirements per dollar of commodity demanded; and tables showing the input-output (I-O) commodity composition of personal consumption expenditures and producers' durable equipment expenditures in the national income and product accounts. Presents concepts and methods used in the 1987 benchmark accounts; concordance between I-O and 1987 Standard Industrial Classification codes; description of the components of the measures of output, intermediate inputs, and value added; and mathematical derivation of total requirements tables. 468 pp. \$29.00 (GPO STOCK NO. 003-010-00251-4).

**New!** **State Personal Income, 1929–93.** (1995) Presents detailed annual estimates for States and regions of personal income for 1929–93, including estimates of per capita personal income, personal income by major source, and earnings by industry. Also presents annual estimates for States and regions of disposable personal income and per capita disposable personal income for 1948–93 and quarterly estimates of personal income for 1969–93. Provides information about the sources and methods used to prepare the estimates for 1987–93 and samples of all the detailed tables of personal income and employment that are available for regions, States, counties, and metropolitan areas. 444 pp. \$27.00. (GPO STOCK NO. 003-010-00257-3).

**Local Area Personal Income, 1969–92.** (1994) Presents the estimates of personal income and per capita personal income for 1969–92 for the United States, regions, States, counties, and metropolitan areas. Also presents the Census Bureau's estimates of population that were used in the derivation of per capita personal income. Provides information

about the sources and methods used to prepare the estimates for 1987–92 and samples of all the detailed tables of personal income and employment that are available for regions, States, counties, and metropolitan areas. 784 pp. \$41.00. (GPO STOCK NO. 003-010-00249-2).

**Foreign Direct Investment in the United States: 1992 Benchmark Survey, Preliminary Results.** (1994) Presents preliminary results of BEA's 1992 benchmark survey of foreign direct investment in the United States. Benchmark surveys, which are conducted every 5 years, are BEA's most comprehensive surveys in terms of both coverage of companies and subject matter. The publication presents information on the financial structure and operations of U.S. affiliates of foreign direct investors, including data for items—such as employment covered by collective bargaining agreements and merchandise trade by product and country of destination or origin—that are collected only in benchmark survey years. Data are classified by industry of U.S. affiliate, by country of ultimate beneficial owner, and, for selected data, by State. 124 pp. \$7.50 (GPO STOCK NO. 003-010-00248-4).

**New!**

**Foreign Direct Investment in the United States: Operations of U.S. Affiliates of Foreign Companies, Preliminary 1993 Estimates.** (1995) Presents preliminary results for 1993 from BEA's annual survey covering the financial structure and operations of nonbank U.S. affiliates of foreign direct investors. Data are classified by industry of U.S. affiliate, by country and industry of ultimate beneficial owner, and, for selected data, by State. 104 pp. \$6.50 (GPO STOCK NO. 003-010-00255-7).

**Foreign Direct Investment in the United States: Establishment Data for Manufacturing, 1991.** (1994) A joint effort by BEA and the Bureau of the Census, this is the latest in a series of publications that present new data for foreign-owned U.S. manufacturing establishments (plants), including data on their number, value added, shipments, employment, total employee compensation, employee benefits, hourly wage rates of production workers, cost of materials and energy used, inventories by stage of fabrication, and expenditures for new plant and equipment. The data are disaggregated by detailed industry (up to 459 industries), by State, and by country of investor. 220 pp. \$14.00 (GPO STOCK NO. 003-010-00250-6). *Also available in this series are publications presenting data for: 1990,* 216 pp. \$14.00 (GPO STOCK NO. 003-010-00242-5) *and 1988,* 204 pp. \$13.00 (GPO STOCK NO. 003-010-00244-1).

**U.S. Direct Investment Abroad: 1989 Benchmark Survey, Final Results.** (1992) Presents final results of the latest benchmark survey of the worldwide operations of U.S. multinational companies. Contains detailed 1989 data on the financial structure and overall operations of U.S. parent companies and their foreign affiliates in 263 tables organized by industry of parent or by country and industry of affiliate. Also contains a complete methodology and copies of survey forms and instructions. 448 pp. \$25.00 (GPO STOCK NO. 003-010-00234-4).

**New!**

**U.S. Direct Investment Abroad: Operations of U.S. Parent Companies and Their Foreign Affiliates.** (1995) Two publications containing results for 1992 and 1993 from BEA's annual survey of the worldwide operations of U.S. multinational companies. Contains information on the financial structure and operations of U.S. parent companies and their foreign affiliates. Data are classified by country and industry of affiliate and by industry of U.S. parent. 100 pp. \$6.50 each. **Preliminary 1993 Estimates:** GPO STOCK NO. 003-010-00254-9; **Revised 1992 Estimates:** GPO STOCK NO. 003-010-00253-1.
